Experience

Om Logistics Ltd, *Software Engineer* | Delhi, India
Dec 2023 - Present
- Collaborating with UX designers, product managers, and other stakeholders to understand user requirements and translate them into technical solutions.
- Identifying and addressing performance bottlenecks in frontend applications to ensure fast and efficient user experiences.
- Collaborating with the development team to resolve code conflicts and maintain a stable codebase.
- Actively participating in retrospectives to identify areas for improvement in development processes.Analyzing and solving complex technical problems related to frontend development.

Cognizant Technology Solutions, *Associate* | Pune, India
March 2021 - July 2023
- Worked on JavaScript, ReactJS, Redux, NextJs, NodeJs contributing to the development and maintenance of Web Application for the client PGE.
- Utilizing Technologies such as Tailwind CSS, Redux, Routing, SoapUI, Restful API, SQL to enhance working capacity and solving multiple complexities.
- Used hooks like useState, useEffect, and useContext to manage state and side effects in functional components as well as have a good understanding of Class Based Component and how life cycle works.
- Integrating with RESTful APIs and managing data fetching and state updates in their application. Writing unit tests and end-to-end tests for React components and Redux stores using tools like Jest and React Testing Library.

Bristlecone, *Intern* | Noida, India
May 2018 - July 2018
- Worked on C.L.I. Protector for Encryption and Decryption of codes with the help of JAVA.

Education

7.5/10	**BTech in Electronics And Communication Engineering**, *JSS Academy of Technical Education*	Noida, India	2016-20
8.5/10	**Intermediate** , *Florets International School*	Kanpur, India	2015
9.6/10	**High School** , *Florets International School*	Kanpur, India	2013

Achievements: AI and ML for Business Excellence (IIM Kozhikode, Kerala)

Skills

Language	JavaScript
Framework	ReactJS, Redux, NextJS, NodeJS, ExpressJS
Tools	TailwindCSS, GIT, HTML5, CSS, Postman, SoapUI
Database	MongoDB, OracleSQL

Projects

Weather App

Weather Provider App, Personal Project
- Developed a Food Deliver Clone named Food Panda, using React for the frontend, Redux for state management, and Tailwind CSS for styling. This project is a web application that allows users to explore a variety of food items and place orders seamlessly.
- Built with Next.js, leveraging React components for a seamless user interface. Integrated external APIs for fetching weather data.
- Addressed data fetching challenges from the weather API to ensure real-time updates. Implemented error handling for enhanced user experience.

Food Panda

Food Delivery App, Personal Project
- Developed a dynamic Weather Forecast App using Next.js to provide real-time weather updates and forecasts.
- Built with Next.js, leveraging React components for a seamless user interface. Integrated external APIs for fetching weather data.
- Enables users to browse a diverse menu, view details of food items, add items to the cart, and complete the ordering process. Implemented Redux for efficient state management, providing a smooth and interactive user experience.

Cinebility

Movie Search App, Personal Project
- Designed and implemented a React JS project that allows users to search for movies using GPT (Generative Pre-trained Transformer) for enhanced search capabilities. Integrated Formik for robust login and sign-up form validation.
- Enables users to search for movies with advanced intelligence powered by GPT. Implemented secure user authentication with Formik, providing a seamless and validated login and sign-up experience.
- Implemented Formik to streamline the login and sign-up processes.
